

• Strong Hydraulic Arm System

- Arm rotatable through a full 245 degrees
- Box weld design maximizes strength
- Powerful hydraulic cylinders permit high load capacity
- Some hydraulic hoses routed inside boom for protection
- Large expanding pins minimize play and simplify maintenance

• Flap Down Outriggers

- Front and rear outriggers create a wider footprint for exceptional stability
- Outriggers fold up for easy access through narrow spaces

• Tools

Arm handles a variety of tool attachments, including hydraulic hammer, bucket, grapple and concrete crusher

The Brokk 90 Remote Electro-hydraulic Demolition Machine

The Brokk 90 is one of the most versatile tools on the market for demolition in confined spaces.

- Lightweight, compact design for easy transport on truck or trailer
- Great manoeuvrability

- Small footprint for access into narrow, weak structures
- High input power and long reach for major commercial and industrial applications
- Powerful, versatile tool capacity for maximum efficiency in confined spaces

Never before has it been possible to tread so lightly and yet have such an impact. When it comes to working in confined spaces, the Brokk 90 is in a class of its own.

Size Matters

When demolition work has to be carried out in a confined space, size really does matter. The aim is to provide as much power and versatility as possible at the site, and the Brokk 90 achieves that aim. Its compact design, easy operation and powerful tools make it the perfect choice for use in a wide variety of residential, commercial and industrial environments.

Goes Anywhere

Weighing only 980 kg (2160 lb) in its basic configuration, the Brokk 90 is small, light and mobile enough to give you power in places you never thought possible. You can transport it on a pickup truck, roll it across floors in homes, take it from floor to floor in an ordinary lift - and it just loves to climb stairs. Its small footprint means it can get through any standard doorway and into basements, larger bathrooms - in fact, it can get into almost any room where a powerful, labour-saving tool might be needed. The Brokk 90 is of course fitted with a tool from the broad range of demolition attachments available.

Power Where You Need It

The Brokk 90 couples a compact chassis and undercarriage with a powerful 11 kW electric motor and a three-part hydraulic arm system that has a reach of a full 3.6 m (142

in). This combination enables the Brokk 90 to carry an extremely powerful hammer in relation to its weight. The result is a machine that's light and mobile enough for residential sites, but powerful enough for more heavy-duty commercial and industrial jobs.

Safer And More Productive

Safety is the main concern in any confined space. The Brokk 90 is designed to work just about anywhere, so you don't have to. Its wireless digital remote control system gives the operator precise control of the machine while keeping a safe distance from flying debris or falling structures. The remote control unit weighs just 3 kg (6.6 lb) and allows the operator to stand clear of moving, vibrating equipment and get the safest and best view of the work. Having a better vantage point and working with equipment that's easier to control means that operators suffer less from fatigue and are able to work faster, which results in greater productivity.

Facts	Products			
	Brokk 40	Brokk 90	Brokk 180	Brokk 330
Weight, kg (lb)	380 (794)	980 (2160)	1900 (4190)	4400 (9700)
Width min. mm (in)	600 (23,6)	780 (30,7)	800 (31,4)	1500 (58,5)
Height min. mm (in)	740 (28,8)	1210 (47,6)	1392 (54,8)	1650 (64,9)
Motor output, kW	4	11	18,5	30
Recommend./max. weight attachment, kg (lb)	60 (132)	140 (308)	230 (507)	550 (1210)

Runs Quietly, Treads Lightly

- The 11 kW electric motor is quiet, with no harmful emissions
- Small footprint and rubber tracks combine to minimize impact on site

Additional Options

- Automatic hammer greasing increases tool efficiency and longevity and minimizes maintenance
- The Brokk 90 can be adapted for use in hot environments, such as cement kilns, steel foundries and other process industries

When it comes to working in confined spaces, size does matter. With its compact design and heavy-duty capacity, the Brokk 90 is small and agile enough to get into tight spots, yet it still packs enough of a punch for those bigger jobs.

For maximum versatility in a tool for use in confined spaces, the Brokk 90 is the perfect choice - demolition in a class of its own!
