Sales, Service, Parts, Training, and Demo Rental

Only authorized Brokk distributor for USA and Canada - No others = No Confusion !

The smallest Brokk performed successfully in a bathroom

demolishing. The company Öregrund Bygg AB have been renovating 426 bathrooms with the help of the smallest Brokk family member since May 2005.

The houses were built in the fifties when it was common to have small bathrooms, from approx. 16 sq. ft. to 37.7 sq. ft. Four people from Öregrund Bygg have been working on this renovation, which has been very successful. For the first two years they used the Brokk 40 which they later replaced by the new powerful Brokk 50. Johan Karlsson, teamleader at Öregrund Bygg AG says "the advantages of using the Brokk robot have been many". For example the machines powerful hitting forces combined with the small outside measurements and low weight has been the most important things for us". Mr Karlsson continues by telling us "it is not a problem for the operator to operate the machine a full working day and get through doorways only 23.6 inches wide". A normal sized bathroom took not even one whole day to demolish with the help of the Brokk robot.

Focus on the environment

The environment has been a very important issue in this demolishing project. Some of the demolition compounds have been taken away with the help of a big vacuum trailer and the rest has been sorted into different containers to be recycled. There is a lot of dust when bathroom tiles are demolished and so the apartments and the stairs have been vacuum a few times each week to ensure a clean environment.

Renovating 426 bathrooms in under 3 years is a huge task. One can only wonder how many resources such a project would require if they did not have the small and effective Brokk 50 to complete the task!

Contact your local area manager for more info. If you have a used machine to sell or looking to buy we may be able to assist.

Free of charge!

The name Brokk has been taken from the mythical figure Brokk, who forged a hammer for Thor, the god of war, in the realm of the Norse gods. Brokk was small but very strong, just like our machines

With Brokk you too can do it all!
